INTRODUCTION

The team is founded by a pair of well known and well connected, trustworthy devs who have lots of experience in various projects, some of which saw major growth and success.

We're going strong with a powerful, large community which helps us advertise and shill our project where it matters the most, winning every poll and bringing lots of members to call channels which work with us.

We've garnered support from a lot of the most well known and popular influencers of the BSC world, who are not only supporting us with advertisements, but also actively invest in our token and even engage with the community in our Telegram group chat.

Our chart is healthy and had experienced exponential growth in short times, building new floors and breaking ATH records with every coming day. Dips get eaten up by new and recuring investors, quickly stopping downwards trends. This proves that the project is being watched as new investors wait for good opportunities to join in.

We have already expanded our horizons and moved away from typical shilling and influencer advertising, instead using hybrid methods of spreading word about us through physical mediums, such as billboards across multiple different continents.

1. TOKENOMICS

Total Supply: 100,000,000,000

Supply Breakdown: 100% added to liquidity

Buy/Sell Tax: 10%

Developers

1% of every buy, sell and transfer will be sent directly to the burn wallet. Providing the safest and most permanent source of liquidity while reducing the total circulating supply.

Liquidity

1% of each transaction will also be sent to the liquidity pool. The action of pairing $GOBLIN2 to BNB will result in a more solid foundation along with Burning.

Marketing

7% of each transaction will be sent to Marketing Wallet. Marketing funds will be used to further increase the reach and utility of $GOBLIN2 and resulting in a more valuable token for all holders.

Team

1% of each transaction will be sent to Team Wallet. Team funds are necessary to pay all of the staff members as this is their job.

3. P2E GAME

Each NFT will get a chance to play the game once every 24 hours. The player will choose his card and enter the game and pay gas fees along with the entry fee which will be in $GOBLIN2 Token. As the game starts, the screen will load up with the image of player's NFT character, to continue the game, the player will swipe his card to the left and one female character will be shown, which will be set as a **match,** based on random generated probability. If it's a match, the player will get 2X of the entry fee he paid for. If it's not a match, the game ends and the player can try again next day. Each time the player plays, and there is match, the prize money will double. 2X, 4X, 8X. Maximum swipe in a day will be 3 times.

Prizes are reflected below in BNB for better understanding. In game, the entry fee and prizes will be in $GOBLIN2 (Native Currency)

	Rarity Level Uncommon	Rarity Level Rare	Rarity Level Epic	Rarity Level Legendary
First Time	0.10 BNB	0.10 BNB	0.10 BNB	0.10 BNB
Second Time	0.20 BNB	0.20 BNB	0.20 BNB	0.20 BNB
Third Time	0.40 BNB	0.40 BNB	0.40 BNB	0.40 BNB

Entry fees for each card type: (Discounted Entry Fees for Better Ranks)

Rarity Level Uncommon: 0.025 BNB

Rarity Level Rare: 0.03 BNB

Rarity Level Epic: 0.04BNB

Rarity Level Legendary: 0.05BNB

Winning Probability:

	Rarity Level Uncommon	Rarity Level Rare	Rarity Level Epic	Rarity Level Legendary
First Time	50%	50%	50%	50%
Second Time	40%	35%	30%	25%
Third Time	30%	25%	20%	15%

If the player loses on the third swipe, he gets the refund of the entry fees.

5. GOBLIN SWAP

One of the most prominent features that have entered the crypto market is Token Swap. The main motive behind this feature is to provide users with crypto-to-crypto trading. The first definition of token swaps focuses on the instantaneous exchange of cryptocurrencies without any crypto-to-fiat exchange. As of now, you can find different exchange services on the market, enabling users for purchasing and selling cryptocurrencies for other crypto or traditional currencies.

GoblinTwoSwap lets users trade without the need to go through a Centralized Exchange. Everything you do on GoblinTwoSwap is routed directly through your own wallet—no need to trust
